BHAVNA JAYAKUMAR

Chennai, India | +91 7200291322 | bhavnajayakumar@gmail.com | LinkedIn | GitHub

EDUCATION

SRM Institute of Science and Technology | Ramapuram, Chennai **Graduation Date**: May 2027
B.Tech Computer Science Engineering with specialization in AIML (CGPA: 9.42)
Class XII: 71.6% | **Class X:** 85.8%

WORK EXPERIENCE

Full Stack Developer Intern | Finan Consulting (Remote) **Jun 2025 – Aug 2026**

- Developed and tested features for AI Powered SaaS-based HR and Lead Management platforms, contributing across frontend, backend APIs, authentication flows, and end-to-end workflow validation
- Debugged application issues, identified critical bugs during beta testing, and collaborated with teams to improve products before release
- Participated in UAT and iterative release cycles, incorporating feedback and resolving issues across enterprise application workflows

LEADERSHIP

Head of Technical Club | Codekrafters Club, SRM IST **Apr 2025 - Aug 2026**

- Organized HackVerse'25, a National-level AI and Blockchain hackathon with 200+ participants, coordinating problem statements, judges, stakeholders, and technical execution
- Led cross-functional teams of 20+ students through project ideation, development, testing, and deployment

SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

AI / Generative AI: LLMs, Generative AI, Agentic AI, RAG, Embeddings, Prompt Engineering, NLP, Computer Vision

Machine Learning & DL: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, EfficientNet-B4, ResNet-50

Backend & Database: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Supabase

Frontend/Tools: React.js, HTML5, CSS3, Git, GitHub, Postman

ACHIEVEMENTS

Smart India Hackathon (SIH) Internal Hackathon – Winner
NxtGen Hackathon – Runner-Up
Performance Excellence Award – Finan Consulting

PROJECTS

SatQuery AI – Generative AI Satellite Query & Analysis Platform | Agentic AI, Python, PyTorch, LLMs, RAG, Embeddings, REST APIs, EfficientNet-B4, ResNet-50
Building a Vision-Language system with remote-sensing capabilities for an ISRO problem statement, integrating Gemini API, Meta SAM2, and fine-tuned EfficientNet-B4 and ResNet-50 models for multi-sensor satellite image analysis
Ping – AI -powered CRM for smarter customer engagement | React, Node.js, Express, MongoDB, OpenAI
Built a full-stack CRM that converts natural-language business goals into AI-generated customer audiences, messages, and campaign send times Link
Netra – AI-Powered Patient Flow & Hospital Operations Platform | Python, FastAPI, Scikit-learn, Pandas, NumPy, Next.js, Supabase
Developed an AI-powered hospital platform using ML models to predict patient length of stay, ward requirements, and overflow probability, supporting smarter triage and resource planning GitHub
iReady – AI interview practice platform | React, Flask, Python, scikit-learn, TextBlob, NLTK, ReportLab
An NLP-powered interview practice platform that analyzes HR answers using TF-IDF similarity, grammar correction, and keyword matching. Link
